The 11 Indiana regional metrics on these two pages are primarily an aggregation of the latest county-level American Community Survey estimates; in several cases, the county data lags behind state information. State level results (based on U.S. Census estimates) may vary slightly. This adjustment is necessary because some Indiana counties lack sufficient population for the Census reports.

*High school graduation rates reflect non-waiver graduation rate of public and private high schools, as calculated using the state's methodology. These data are one year newer than those reported in the state-by-state comparisons and include private schools. Some non-traditional schools – virtual schools, schools that primarily serve adults, those in behavioral settings and other unique situations – are excluded from totals. State level data for this measure are not directly comparable to regional/county data.

**For adults between the ages of 25 and 64.
