

Environmental Permitting and Reporting Conference  
June 16 - 17, 2021  
Indiana Chamber Conference Center

Presented by

June 16, 2021

- 8:30 a.m.      **Registration and Continental Breakfast**
- 9:00-9:15      **Opening remarks – Indiana Chamber of Commerce and KERAMIDA Inc.**
- 9:15 a.m.      **Environmental Management Fundamentals: Getting Started and Staying on Track**  
This is an introduction to environmental management, providing a brief overview of some of the common regulations and requirements that are managed on a day-to-day basis, introducing some tools for management of compliance and discussion of the role of an EHS manager from an experienced EHS manager's perspective.  
*John Wellspring, KERAMIDA, Inc. and Monica Klaas, Quemetco, Inc.*
- 10:00 a.m.      **Air Permitting 101**  
Air permitting can be an ominous topic for both beginners and seasoned EHS professionals. This presentation will help you understand the basics of state and federal air regulations and how they might apply to your facility. Topics to be covered include the types of air permits, determining your permit level, reading and understanding your air permit and Indiana air regulations (326 IAC). Suitable for all types of facilities and all permit levels.  
*Genny Willman, KERAMIDA Inc.*
- 10:45 a.m.      **Break**
- 11:00 a.m.      **Water Permitting 101**  
What are the requirements of National Pollutant Discharge Elimination System (NPDES) direct discharge and pretreatment permits? How are permit limits developed? What does an application entail? What is the most effective way to negotiate permits with regulators? Should I perform a water balance? How should I go about collecting and analyzing wastewater samples? Becoming familiar with these and other issues related to water permitting is an important first step toward ensuring that you achieve or remain in compliance with regulations (327 IAC) governing water quality.  
*Kristen Belcredi, KERAMIDA, Inc. and Taylor Wissel, Senior Environmental Manager, Office of Water Quality, Indiana Department of Environmental Management (IDEM)*
- 11:45 p.m.      **Waste Permitting 101**  
How do you maintain compliance with hazardous waste management regulations? What tools does a new manager need to keep their facility in compliance? How should you report your waste activity to IDEM? How do the revisions to the hazardous waste rules impact me? This introduction to waste permitting will answer these questions and review the basics of the regulations and requirements for maintaining compliance under Indiana code 329.  
*Genny Willman, KERAMIDA, Inc. and Paula Aldrich, Exelead (invited)*
- 12:30 p.m.      **Lunch (provided)**  
**IDEM Update**  
*Commissioner Bruno Pigott, IDEM*

- 1:30 p.m. The Permit NOV Letter Arrives: Now What?**  
Managing a compliance enforcement action is a skill no one wants to develop – until it is too late. Be prepared! Understand the action steps one should take and how to protect yourself and your company during an enforcement action.  
*Amy Romig, Plews Shadley Racher & Braun and John Wellspring, KERAMIDA Inc.*
- 2:15 p.m. Stack Testing 101: Emissions Testing for Reporting and Permit Compliance**  
Stack testing is one of the most stressful events that any one environmental manager must deal with. Understanding stack testing protocols and procedures for compliance testing will improve your understanding of the reporting and compliance responsibilities described in your operating permit.  
*Dave Cline, IDEM (invited)*
- 3:00 p.m. Break**
- 3:15 p.m. Preparing for and Dealing with an Emergency Release: Self-Disclosure Reporting**  
This session will detail how to disclose violations when an audit reveals an issue or a release occurs. Topics include who to call, when to report and how much time you have to disclose. Since each program has different requirements, preparing strategies and planning for a spill prior to an occurrence may assist in reporting and avoid agency enforcement action.  
*Mack Overton, KERAMIDA, Inc. and Max Kelln, Faegre Drinker Biddle & Reath LLP*
- 4:00 p.m. Adjourn for the Day**  
**Environmental Checklist Workshop and Reception (Optional)**  
Immediately following the day's events, we will provide an optional networking and working reception for all attendees interested in developing an electronic compliance calendar for your facility using K-Port, KERAMIDA's online client portal. K-Port was custom-built to meet our clients' needs for electronic EHS management, tracking, auditing, record keeping. Attendees will leave the workshop with a fully-functioning electronic compliance calendar that includes recurring tasks, automated email reminders, and cloud-based record keeping.

June 17, 2021

- 8:30 a.m. Continental Breakfast**
- 9:00 a.m. Developing and Maintaining an Air Emissions Inventory**  
Developing and maintaining a thorough and accurate air emissions inventory is a foundational step for every environmental compliance program. We will present a basic guide for developing an air emissions inventory and discuss the different types of emission inventories and the purposes of each type. We will discuss the importance of emissions inventories for EHS compliance reporting and air permitting. Multiple example scenarios will be covered with step-by-step explanations and calculations.  
*Wesley Fleming, KERAMIDA Inc.*
- 9:45 a.m. Break**
- 10:00 a.m. Annual EPCRA Reporting Overview**  
This presentation will focus on the two major annual reports required by the Emergency Planning and Community Right-to-know Act (EPCRA), the Tier II Emergency and Hazardous Chemical Inventory and the Toxic Release Inventory (Form R). Topics to be covered include reporting applicability, recordkeeping and calculations, online reporting instructions and common exemptions/questions. Special attention will be paid to the use of state and federal online reporting systems, including an overview of recent GHS and other updates to the online systems.  
*Ellie Agioutanti and Nathaniel Cullen, KERAMIDA Inc.*

- 10:45 p.m.      **RCRA: Hazardous Waste Generator Compliance and Reporting Update**  
This presentation will provide an overview of RCRA and the recent federal EPA Hazardous Waste Generator Improvements Rule. This rule changed the organization and content of 40 CFR 262 to incorporate most requirements applicable to generators of hazardous waste. This presentation will cover the changes to the rule including generator designations, episodic generation, waste notification, waste consolidation, contingency planning, container labeling/ marking and updates to accumulation area closure requirements. A legal perspective on Indiana adoption and compliance and enforcement issues will be provided.  
*John Wellspring, KERAMIDA, Inc. and Will Gardner, Taft Law (invited)*
- 11:30 a.m.      **Lunch (provided)**
- 12:30 p.m.      **Rule 6 Compliance: An Overview of Indiana's Industrial Stormwater Rule**  
Indiana's Industrial Stormwater Permitting regulations ("Rule 6") affect all industrial operations in Indiana. This presentation will review identification of stormwater exposure, submission of initial and renewal notices of intent, annual sampling and reporting requirements, no-exposure certifications, and best management practices for stormwater pollution prevention. We will also discuss upcoming changes to Indiana's Stormwater program, including the transition away from general permits to individual NPDES stormwater permits.  
*Nathaniel Cullen, KERAMIDA, Inc. and Brian Wolff, Chief, Surface Water, Operations and Enforcement Branch, IDEM*
- 1:15 p.m.      **Air Permitting: Lessons learned, Best Practices and Avoiding Pitfalls in Permit Renewals and Modifications**  
This presentation will focus on changes in permit requirements that may be unexpected when obtaining an air permit renewal or modification. Some examples of changes include requirements affecting exempt and insignificant activities, stack testing, preventive maintenance plans and emission calculations.  
*Kathy Moore, KERAMIDA, Inc. and Jaime Saylor, Hatchett and Hauck (invited)*
- 2:00 p.m.      **Permit Violations and Enforcement Overview: The Most Common Permit Violations and How to Avoid Them**  
Lapses in compliance most often occur in each environmental media and discussing strategies that can help your company avoid those deviations and potential enforcement issues is necessary. Bring your questions and be prepared to discuss those situations to the extent that you can.  
*Jennifer Thompson, Dentons Bingham Greenebaum; Valerie Tachtiris, IDEM; and Mack Overton, KERAMIDA, Inc.*
- 2:45 p.m.      **Adjourn**
