Big Wins for Business Recovery and Indiana Competitiveness, But Also Missed Opportunities

By Kevin Brinegar, President and CEO

Before the start of each legislative session, the Indiana Chamber announces its priority policies and areas of focus. These are matters that would have wide impact on businesses and citizens throughout the state. All are tied to goals in the Chamber's *Indiana Vision 2025* long-term economic development plan for the state which has 37 goals under four drivers: Outstanding Talent, Attractive Business Climate, Superior Infrastructure, and Dynamic and Creative Culture.

On page 4 are the recent bills that contain those priority goals, their outcome and why they are good policies for the state. The 2021 legislative session was strong for business recovery and several long-sought policies became reality. That's remarkable in the face of the pandemic and the necessary modifications to procedure. Yet, there still were missed opportunities that could have made this General Assembly session even greater. Most notably: not increasing the state's low cigarette tax, passing a FAFSA completion requirement for high school seniors or establishing a state work share program.

For the 47 bills and amendments that are included in this report, you can see if your legislators supported a pro-jobs, pro-economy agenda by viewing their scores on page 3. For many legislators, the scores are higher this year.

The Indiana Chamber remains fully committed and prepared to play a vital role in the business community's ultimate recovery from the pandemic effects. Legislative actions – like the ones taken in 2021 – will be critical to how quickly Indiana can rebound from the COVID-19 pandemic and return to the prosperity it enjoyed as a Midwest leader and national competitor.

We encourage you to review the *Indiana Vision 2025* plan at www.indianachamber.com/2025 and its latest accompanying Report Card (May 2021 release), which compares how Indiana is doing with the rest of the country.

Developing the Business Agenda

The Indiana Chamber provides more information on important pro-jobs, pro-economy issues to legislators and businesspersons than any other organization in the state. In preparation for each legislative session, the Indiana Chamber's numerous policy committees study the various public policy issues impacting businesses and their employees and formulate positions on these issues.

Following review and adoption by the Indiana Chamber's board of directors, a publication titled *Legislative Business Issues* is sent to all legislators, Chamber members, local chambers of commerce and coalition members. This publication outlines the Indiana Chamber's position on important public policy issues and provides invaluable analysis.

During the legislative sessions, lawmakers are kept advised on key business issues through various editions of the *Legislative Agenda* report and other communications that detail the Indiana Chamber's position on every bill that has a pro-jobs, pro-economy impact. The *2021 Legislative Vote Analysis* measures the voting performance of individual legislators on bills that best reflect the Chamber's policy positions.

2021 Priority Legislation

CIVIL JUSTICE

Our Priority: Support enhanced legal liability protections for Hoosier businesses if an employee, customer or other person contracts the COVID-19 virus after returning to work or visiting the business.

Legislation: Senate Bill 1 – Civil immunity related to COVID-19; signed by the Governor

Protects employers from litigation regarding possible coronavirus exposure to employees or visitors and is retroactive to March 2020. Hoosier businesses that follow accepted COVID-19 safety guidelines now are not subject to litigation that could devastate their companies – many of which struggled financially over the last year. That’s why this bill was so important and is a great relief to businesses – particularly smaller ones – across the state. And it’s the reason this was our top legislative priority this session.

Legislation: House Bill 1002 – Civil immunity related to COVID-19; signed by the Governor

Protects health care providers from professional discipline for certain acts or omissions in response to COVID-19. It also provides immunity from civil liability to certain persons, entities and facilities providing health care and other services for certain acts or omissions related to the provision of health care services and other services during a state disaster emergency. Finally, it prohibits filing a class action lawsuit against political subdivisions and postsecondary educational institutions for a loss arising out of COVID-19 in a contract or implied contract.

ECONOMIC DEVELOPMENT / TECHNOLOGY

Our Priority: Support state efforts to further prepare Indiana for the digital economy, including continuing to bring high-speed broadband to all corners of the state.

Legislation: Various (HB 1449; SB 352 and 377) – Broadband expansion to underserved areas and populations; signed by the Governor

Represents giant steps in the right direction to ensure access to and adoption of high-speed broadband, regardless of the city, town or community in which an individual or business resides. By allocating \$250 million to these efforts and making the grant program more accessible, transparent and competitive, the state is continuing to show its commitment to modern connectivity and technology, which goes a long way in making areas attractive for businesses and individuals to remain in or locate.

EDUCATION / WORKFORCE DEVELOPMENT

Our Priority: Support requiring Indiana high school seniors to complete the Free Application for Federal Student Aid (FAFSA) – with an opt-out option – to ensure that more Hoosier students have the opportunity to earn industry-recognized credentials and degrees with reduced or no debt.

Legislation: Senate Bill 54 – FAFSA Expectation; failed

Completing the FAFSA qualifies students for a variety of merit- and need-based financial aid. A measure to spur greater FAFSA completion

VOTE SELECTION CRITERIA AND SCORING

The Indiana Chamber has well-established criteria for selecting votes to be included in the *Legislative Vote Analysis* (LVA). Bills included meet the following four criteria:

1. Votes on all subject matter used in LVA are based on and best reflect the Chamber’s legislative policy as determined by the Chamber’s board of directors and expressed in *Legislative Business Issues*, *Legislative Agenda* or other Chamber communications to legislators.
2. Each member of the Indiana General Assembly is informed of all bills the Chamber is following, including the Chamber’s position on each, the reasons for the position and the name and contact information of the specific Chamber issue expert to contact for more information.
3. Each member of the Indiana General Assembly is informed of the Chamber’s position on the issue and bill prior to the vote. This notification was provided in editions of the *Legislative Agenda* or other communications with legislators.
4. Only floor votes for which there is a public record are used.

Base scores for each legislator are calculated as a percentage of votes cast in agreement with the Chamber’s position on the bills included in LVA. A modest adjustment factor (positive or negative) has been added to the LVA scoring model to factor in very important legislative activities outside of floor votes on bills the Chamber has taken a position on, including whether a legislator sponsored/ authored these bills and whether committee chairs held hearings or killed these bills. This adjustment factor is applied as a net positive or negative number of additional scored votes and is capped at +/- 10 votes.

Indiana has among the nation's highest rate of smokers due in large part to having among the lowest cigarette tax, testified Indiana Chamber President Kevin Brinegar (l). Our Jason Bearce told lawmakers that completing the FAFSA is a needed workforce and equity policy that would help break the cycle of poverty.

fell apart in the final days, despite a version passing both the House and Senate in the same session for the first time. The Senate wanted the FAFSA completion to be a student expectation (with some opt-outs), while the House wanted to incentivize schools to urge completion – what the Senate and many others feel is the job of the schools anyway. Students often make their postsecondary education decisions based on finances, with some dismissing it altogether for that reason. Why legislators can't see the importance of this and come to an agreement is frustrating, because their failure to act is hurting young Hoosiers and their families who do not know what financial aid opportunities are available to them and will miss out on those grants and scholarships that can further their education and training.

HEALTH CARE

Our Priority: Support raising the state's cigarette tax to discourage smoking and vaping.

Legislation: House Bill 1001 amendment – Cigarette tax increase; failed

We are disappointed that legislative leaders continue to view a cigarette tax increase through the lens of revenue collection and not as a positive impact on Indiana's poor health metrics (not to mention the associated costs these health conditions bring to individuals, employers and the state via Medicaid).

LABOR RELATIONS

Our Priority: Support a work share program that will allow employers to maintain a skilled stable workforce during economic downturns, like what happened during the pandemic.

Legislation: House Bill 1152 amendment – Work share program; failed

There is overwhelming bipartisan support for work share in the entire General Assembly, but unfortunately a few influential legislators continue to keep the policy from progressing. Work share would keep employees on the job part time while receiving employer-sponsored benefits like health care and drawing partial unemployment from the state for their lost hours. Work share also would enable employers to keep team members they have invested time and money into for their training. The refusal to have meaningful debate and to allow work share legislation to reach the House or Senate floor was unconscionable given the pandemic and push for economic recovery.

TAXATION

Our Priority: Support maintaining and enhancing our attractive tax climate.

Legislation: House Bill 336 – Business personal property tax exemption threshold; signed by the Governor

Doubles the acquisition cost threshold for the business personal property tax exemption from \$40,000 to \$80,000. This will save approximately 35,000 additional businesses across the state the compliance cost associated with filing a return when only a small amount of tax is owed.

INDIANA BUSINESS FOR
RESPONSIVE GOVERNMENT

LEADING THROUGH POLITICAL ACTION

IBRG is the non-partisan political action program of the Indiana Chamber of Commerce. It is the business community's largest and most sophisticated program for electing endorsed candidates to the Indiana General Assembly.

www.ibrg.biz

A RECORD OF SUCCESS

Leading Indiana businesses and employers support IBRG because they know it is the single most effective thing they can do to help elect pro-business candidates.

Since 1990, nearly 90% of IBRG-backed candidates have won, and 43 incumbents who didn't support the business agenda have been defeated by IBRG-backed challengers. Meanwhile, scores of pro-economy, pro-reform legislators have been defended.

IBRG's mission is "real change" by holding legislators accountable for their voting records and focusing on elections. IBRG targets the most competitive races to help elect pro-jobs, free enterprise candidates.

ABOUT IBRG

- Non-partisan, primary and general election efforts
- 100% of investments in IBRG fund candidate campaigns, not any administrative or fundraising costs
- Highly targeted investments in key races that will make a difference
- A professional campaign team works "in-the-trenches" with candidates
- Professional polling and targeting for research-driven decision making
- Campaign advertising, grassroots organizing and management
- Voter data management and targeting for candidates

ACCELERATING INDIANA VISION

2025+

Key Initiatives

- Task force work on new long-term vision
- Major research studies
- Rapid, targeted research and action plans
- Employer and employee programs and services

"It's not enough for Indiana to simply 'recover' and try to get back to where it was prior to March 2020. Standing still in today's world is falling behind. We must elevate our performance and help ensure a future that is filled with opportunities for success for businesses and individuals."

Kevin Brinegar
Indiana Chamber president and CEO
